## Monday $13^{\text {th }}$ April

Imagine you have the numbers $1,1,2,2,3,3,4,4,5,5,6,6,7$ and 7 .

Arrange them in such a way that:
$\rightarrow$ Between the 1s is 1 digit
$\rightarrow$ Between the $2 s$ are 2 digits
$\rightarrow$ Between the 3 s are 3 digits
$\rightarrow$ And so on......
