

Tuesday 7th April ANSWER

The numbers represented by question marks are consecutive, ie) they can be written one after another, such as 1, 2, 3, 4, 5.

They are not necessarily in order on the picture however.

If the numbers add up to 80, what do the numbers in the circle add up to?

$$14 + 15 + 16 + 17 + 18 = 80$$

$$\text{Circle} = 48$$
