

## Admissions Offer Information – Induction

### Year 9 Induction

As part of their induction programme, Y9 learners have the opportunity to go to Harper Adams University in Shropshire for a residential trip where they take part in a range of educational and leisure-based activities. The educational lessons involve PSHE (Personal, Social, Health, and Economic), English, mathematics, science, and engineering. The engineering lessons, which are taught alongside Harper Adams lecturers, include vehicle configuration, traction and power, steering and suspension, and chassis design.

The full details of the trip are yet to be confirmed, further information will be provided in relation to dates and cost once we have confirmed the arrangements with Harper Adams University.

The trip provides learners with an ideal opportunity to get to know each other and staff, as well as providing a fantastic launch for their first module which includes learners designing a remote-control off-road vehicle.

### Year 10 Induction

As part of their induction programme, Y10 learners have the opportunity to go to Alton Castle for a range of outdoor, team-building activities.

The full details of the trip are yet to be confirmed, further information will be provided in relation to dates and cost once we have confirmed the arrangements with Alton Castle.

The trip provides learners with an ideal opportunity to get to know each other and the staff.
